ATS PROGRAMMER NO SW

ATS secure card programmer for use with ATS8600 / C4 (USB)

Product overview

With the introduction of secure readers, customers want to be able to control their own security settings in their cards. The secure card programmer together with ATS118x range of secure readers and Advisor Advanced is the solution to assure keys are kept secure. The ATS8600 / C4 manages the users for access to the premise. The Secure card programmer with the secure programmer application using ATS8600 or C4 allows end users to program new cards, that are added to the cards available. These can then easily be assigned to any user.

Details

- USB programmer for Secure Cards used with ATS118x range
- ATS8600 or C4 support Secure programmer application
- Allows end-users to control their own card management from creation up to hand-out and deletion
- Using customer encryption keys
