TVRMobile

TruVision™ TVRMobile Mobile App

Overview

You want to keep an eye on your security setup no matter where you are. TVRMobile provides users the ability to do just that – both in live and recorded view.
As an application for smart phones and tablets, TVRMobile allows security managers and home owners to access their TruVision recorders and IP cameras remotely by connecting directly to the device.
As a result, it becomes possible to monitor your home, office or store no matter where you are.

A full feature set at your fingertips

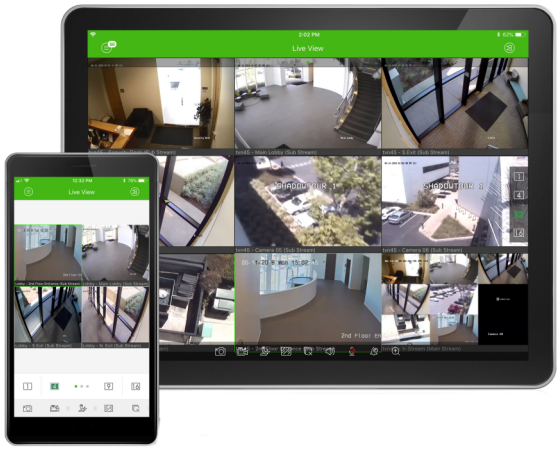

TVRMobile provides an enhanced user experience, with features such as drag & drop, swipe, on-screen PTZ control and many more. Its intuitive user interface allows you to retrieve required video footage, more easily than ever before. Relay outputs of devices and recorders can be controlled through TVRMobile. This enables users to perform actions such as sounding an alarm or opening doors and gates.
The app has the ability to store live or recorded video and snapshots directly on the mobile device. The snapshots/video clips can be exported using standard methods as text, mail, etc.
With the alarm information notification, users are notified of events from the devices. When supported, they can immediately see the live or recorded video of the event.

Phone and tablet support

TVRMobile is available for smart phones and tablets running iOS or Android operating systems. The application is available – free of charge – on the iTunes and Google Play web stores.
The same app can be used for smart phones and tablets. The app will automatically detect if it is running on a phone or tablet and present the appropriate user interface.

Ease of installation

This application provides you with an intuitive interface that allows to set up this license free application by a few touches of your fingers. Download the application from the relevant web store and simply install the application.
After installation, connect to the device by adding the correct IP address and your system is ready to go.
Additionally, you have great features available such as creating favorites, allowing you to quickly connect to whatever camera or recorder you prefer.

Download on the App Store
